

Status report on the operations of the site at Dieu Merci as of January 13, 2021

Press Release - January 13, 2021

Auplata Mining Group – AMG (Euronext Growth - FR0013410370 - ALAMG) is pleased to provide a new update on the status of its mining operations on the site of Dieu Merci.

At the beginning of December, the third ball mill at the Dieu Merci plant was commissioned. The tonnage processed daily approached 300 tons on some days. The effective transition to the nominal production of 300 tons/day is expected to be achieved during the month of January 2021.

The 3 ball mills are now operational on the site at Dieu Merci

As a result of the new constraints to thicken the high pulp throughput and the increased workload of the primary shredder, adjustments are being made with, on the one hand, the preparation of a new blending¹ system, better adapted to the increase in the plant's output, and, on the other hand, the fitting of new tires suitable to support the new workload of the primary shredder.

In addition to the constraints linked to the global pandemic and the festive season, AMG's activity in French Guiana did not stop, which allowed the casting of a new ingot of **7,720 grams** of fine gold before the end of the year.

Luc Gérard, AMG's Chairman and CEO, said: "I send my best wishes to our shareholders and partners for the new year 2021, which promises to be the best year ever for AMG with the ramp-up of the Merciful God plant, which will soon reach nominal production, and the return to normal operations in Peru and Morocco. This, combined with metal prices, especially gold, suggests a 2021 baseline year for AMG.»

AMG in a nutshell

Auplata Mining Group (AMG), incorporated in July 2004 and listed on the Paris Stock Exchange (Euronext Growth) since December 2006, is a polymetallic exploration and mining group. AMG is present in French Guyana and, through its subsidiaries, in Peru, Morocco (listed on the Casablanca Stock Exchange) and Ivory Coast. AMG pursues a dynamic, sustainable and innovative industrial and financial strategy to develop high-potential precious and base metal deposits with the involvement of local players. The company's objective is to produce the metals of tomorrow needed for the energy transition in a clean and responsible manner, while trying to provide France with a national source of supply of strategic metals.

ISIN : FR0013410370 - ALAMG ; ICB : 1777 - Gold Mining.
